

Digital Basic PDF Fixture

Purpose: selectable text baseline; no images; no tables; sane page count.

This document is intentionally simple so extraction failures are easy to isolate.

Expected parser classification: digital_text=true, needs_ocr=false, encrypted=false.

The body uses only built-in Helvetica text objects and short paragraphs.

Numbers and units are plain text: 230 V, 50 Hz, 16 A, 47 kohm, 10 uF.

A converter should preserve line order and page boundaries without layout heuristics.

Plain Text Continuation

01. Baseline sentence 1 with stable reading order and no figure anchors.
02. Baseline sentence 2 with stable reading order and no figure anchors.
03. Baseline sentence 3 with stable reading order and no figure anchors.
04. Baseline sentence 4 with stable reading order and no figure anchors.
05. Baseline sentence 5 with stable reading order and no figure anchors.
06. Baseline sentence 6 with stable reading order and no figure anchors.
07. Baseline sentence 7 with stable reading order and no figure anchors.
08. Baseline sentence 8 with stable reading order and no figure anchors.
09. Baseline sentence 9 with stable reading order and no figure anchors.
10. Baseline sentence 10 with stable reading order and no figure anchors.
11. Baseline sentence 11 with stable reading order and no figure anchors.
12. Baseline sentence 12 with stable reading order and no figure anchors.
13. Baseline sentence 13 with stable reading order and no figure anchors.
14. Baseline sentence 14 with stable reading order and no figure anchors.

Extraction Sentinel Terms

Sentinel-A: alpha bravo charlie.

Sentinel-B: inverter rating 300 VA.

Sentinel-C: branch circuit maximum 20 A.

Sentinel-D: end-of-document marker.
