

Digital Basic PDF Fixture

Purpose: selectable text baseline; no images; no tables; sane page count.

This document is intentionally simple so extraction failures are easy to isolate.

Expected parser classification: digital_text=true, needs_ocr=false, encrypted=false.

The body uses only built-in Helvetica text objects and short paragraphs.

Numbers and units are plain text: 230 V, 50 Hz, 16 A, 47 kohm, 10 uF.

A converter should preserve line order and page boundaries without layout heuristics.
